

# YOUR DRIVEWAY FAILS FOR ONE OF FOUR REASONS

-- ANOTHER LOAD OF GRAVEL ISN'T A FIX --

# 4

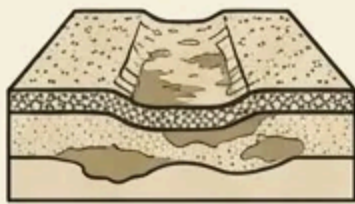

CAUSES, NOT 1

## CROWN LOSS

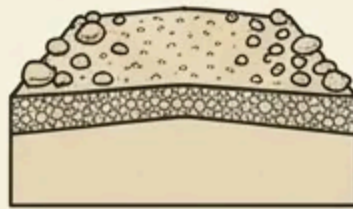

WATER PONDS ON TOP

## BASE FAIL

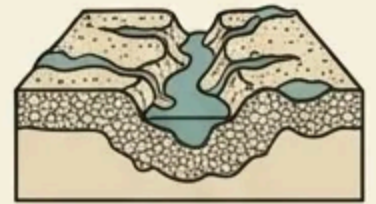

RUTS & SOFT SPOTS

## WRONG SPEC

GRAVEL MIGRATES

## WASHOUT

CUT CHANNELS

**PIN THIS BEFORE YOU ORDER ANOTHER LOAD OF GRAVEL**

## THE FOUR FAILURE MODES

### CROWN LOSS

#### WATER PONDS ON TOP

The 4-6% cross-slope flattened out

### BASE FAIL

#### RUTS & SOFT SPOTS

The ABC base was never compacted to spec

### WRONG SPEC

#### GRAVEL MIGRATES

Wrong stone for the load -- it spreads to the edges

### WASHOUT

#### CUT CHANNELS

Bad drainage carves the surface every storm

## GRAVEL IS THE SURFACE, NOT THE PROBLEM

Adding stone over any of the four causes buys one season. Fixing the cause buys a decade -- a real quote names the cause, the base plan, and the crown spec.
