

# YOUR GRAVEL PILE **LIES** MEASURE IT

A TAPE MEASURE SETTLES IT IN 2 MINUTES

$$VOLUME = \frac{1.05 \times r^2 \times h}{27}$$

*real piles are not perfect cones -- 1.05 corrects for spread*

= 5.6 CUBIC YARDS  
minus 8% settle = 5.2 yards

SAVE THIS BEFORE YOUR NEXT DELIVERY

## THE MATH THAT CHECKS A DELIVERY

**1.35-1.5** TONS / YARD  
ABC gravel -- standard driveway base

**1.2-1.3** TONS / YARD  
#57 or #67 washed stone

**10%** NORMAL VARIATION  
density, settle, measurement error

**20%** RED-FLAG SHORTFALL  
beyond all normal-variation excuses

### EST. 12 TONS IS NOT A SCALE WEIGHT

A real ticket shows gross, tare, and net weight from a certified scale. Estimates with no scale weights are not verified deliveries.
